

This is the initial cabin photo posted by Dwight Horan to the [CountryPlans.com](http://CountryPlans.com) owner builder forum.

3D Home Architect ver 3 model inspired by the house above. Scaled floorplan and editable template model is a free download for members of the [PlanHelp.com](http://PlanHelp.com) subscription website. Click [HERE](#) to see this and other models that can be downloaded and edited from PlanHelp.

Note you must have the 3DHA or compatible Home Designer software to edit this model.

Click [HERE](#) for an article and links to the software.

Click [HERE](#) for a tutorial on using 3DHA.

Another view of the model.

An interior view of the open studio floorplan. With the 3DHA program you can edit this floorplan, move doors and windows and put in walls for a bedroom, bath and kitchen if desired. Model includes an outline post & pier foundation and suggested sizing for joists and rafters.

**Note:** This 3DHA model will print the floorplan, foundation plan and elevations to scale but these are not complete construction drawings. They will need more specific structural information. This could be supplied by a local builder or home designer.
